

Enterprise-class business intelligence for organizations of all sizes

Prism³ ("PrismCubed") is the only business intelligence solution to provide enterprise-class business intelligence specifically targeting the mid-market. With unparalleled ease of use, rapid time to value and pricing model, Prism³ is the last business intelligence solution you will ever need.

Prism³ covers all the stages of business intelligence - from data integration and cleansing, application development and publishing of secure, customizable and interactive web-based applications. Users require no prior programming skills or extensive business intelligence experience.

Try it yourself, no risk, no commitment

Reports, dashboards, guided analytics solutions and periodical analysis can be all accomplished using Prism³. But don't take our word for it. A fully featured 30-day trial version is available for immediate download at <http://www.sisense.com>. Give it a try and experience the next generation of business intelligence yourself.

The Next Generation of Business Intelligence

"The face of BI needs a major lift. BI is old. Its wrinkles tell of hopeful days long ago. BI needs fresh faces to turn heads away from wizened products. Enter SiSense, a BI tools company and one of the pretty, fresh BI faces..."

BUSINESS INTELLIGENCE AT YOUR FINGERTIPS

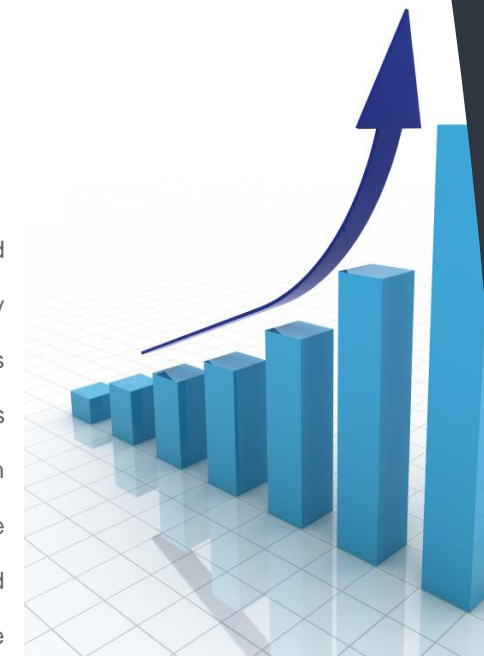

- DASHBOARDS
- REPORTS
- GUIDED ANALYTICS
- AD-HOC ANALYSIS

EASY TO USE

Prism³ is easy to use and takes only hours to learn. Prism³ delivers an intuitive user interface, where most operations are achieved by dragging and dropping visual and data elements. Users are not required to have any prior programming skills, database or SQL knowhow. Formulating business questions, complex filters or custom KPIs is done using visual workflows that is simple even if users have not business intelligence experience at all.

IMMEDIATE VALUE

Prism³ applications are developed and deployed in days. Whether implemented by internal resources or one of our business partners, you will not have to wait six months before getting a suitable return on investment. Prism³ radically changes the way business intelligence is developed and deployed, without lengthy data warehouse projects or OLAP cubes.

"I have to say that I found that the process of building a dashboard to be exceptionally easy and intuitive, and I was very impressed - I was able to put together something that worked very quickly, and it handled layout and formatting in such a way that even someone who is generally rubbish at report design like me could create a dashboard that looked professional."

DEVELOP ANY BI APPLICATION

Equipped with an extensive gallery of visualization components and an interactive environment, Prism³ can be used to develop any type of business intelligence application. From pixel-perfect reporting to full-blown guided analytics solutions with complex business logic, all can be achieved with Prism³, without any programming or coding required.

FROM DATA PREPARATION TO WEB DEPLOYMENT

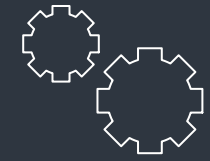

Prism³ is the last business intelligence solution you will ever need. Prism³ addresses all requirements of typical business intelligence applications, including combining disparate sources, handling of large amounts of data, automating ETL (Extract, Transform and Load) processes, application development and seamless deployment as interactive zero-footprint web applications.

MINIMAL RISK, SPECIALIZED PRICING

Prism³ is priced to minimize risk and total cost of ownership. With annual prices available, it is possible to control entry costs. In addition, Prism³ pricing is aimed to encourage widespread use of business intelligence in the organization, therefore paid licenses are only required for application authors and server modules. Application users do not require a paid license.

"The Prism³ software was selected for its asset management, ease of use, low total cost of ownership and the quick set up. It required very little training..."

PREPARING DATA

- Merge disparate data sources
- Transform and manipulate data
- Visual ETL tools
- Automate ETL processes

DEVELOPING APPLICATIONS

- Intuitive, highly visual environment
- No programming skills required
- No SQL experience needed
- No 3rd party components required

DEPLOYING APPLICATIONS

- Interactive web applications
- No client-side installation at all
- Single-click deployment
- Unlimited deployment licenses
